

AUTOID UTouch 2-S

Industrial UHF RFID Mobile Terminal

AUTOID UTouch 2-S is a new member in UTouch family, it brings the new features for short range UHF reading of 6m back toward object and 3m vertical which opens up a new world of user application in different scenario, pocket design to carry everywhere at any time. Also, many ergonomic designs are taken into consideration to tackle the day to day increasing challenges of heavy work burden, it have wavy groove and honeycomb texture design on the backside for non-slip design, and top NFC for convenient card reading. Support IP68 and 1.8 m drops to concrete, frontline workers can use worry-free.

Product Features

The transmission of data is real-time, fast, and stable with WIFI6

Transmission speed up to 1.2Gbps,39% improved than WIFI5, network capacity utilization is increased by 2-3 times, and multiple applications data concurrent without queuing.

Enhanced roaming, performance improved by 70%, packet loss rate as low as 1-2%

Balanced weight with ultra rugged

Light and thin, only 14.3mm at the thinnest point, and weighs 325g, which meets the requirements of portability, IP68, 1.8m drops specification

Versatile usage

Impinj E510, Support reading distance 0-6m back toward object or vertical 0-3m, Unique anti-collision algorithm, maximum group reading speed up to 700 times/sec, with 0.5 dBi high-sensitivity circularly polarized antenna, 1-30 dbm precise step control to achieve different user application
